CALL FOR APPLICATION

The project - „Transnational cooperation initiative fostering developing forward thinking skills of students, teachers and workforce in sustainability-relevant sectors posed by Business 4.0 trends through innovation in Business& Engineering education and training”, organized through the ERASMUS+ programme, will organise a short-term teacher-training during the aforementioned period.

The training aims to:

- Incorporate improved perspectives on complex skills demands posed by digitisation and sustainable Business 4.0 creation.
- It enriches learning experience with feedbacks and insights from the testing phase of Educational Initiative.
- Enables cross border knowledge exchange on sustainability-related subjects

The benefits for selected teacher are:

- Better familiarized with Business 4.0 concept in teaching and learning process
- Brings evidence of upgraded knowledge and successful examples, which steer to professional development
- Strengthens the motivation of participants to become aware of the innovation potential and sustainable eco-systems in their local contexts.
- It increases synergies between education and world of work and enables the development of genuine educational resources in various sustainability-related topics.

The training will be led by expert trainers in business and international university co-operation and will be deployment on 5 (five) training days, with mix of presentations, discussions, and workshops:

For higher education institutions involved the event represents a meaningful opportunity to develop and modernize courses and syllabus, for developing international collaboration via digital learning and expanding the use of Business 4.0 elements.

Each partner has allocated 2 positions for this event, for teachers/ staff employed in the university, based on selection.

Eligible participants: teachers and training staff from the project consortium
